

Project Design Phase- II Technology Stack (Architecture & Stack)

Date	16 October 2022
Team ID	PNT2022TMD32760
Project Name	Containment zone alerting application
Maximum Marks	4 Marks

Technical Architecture:

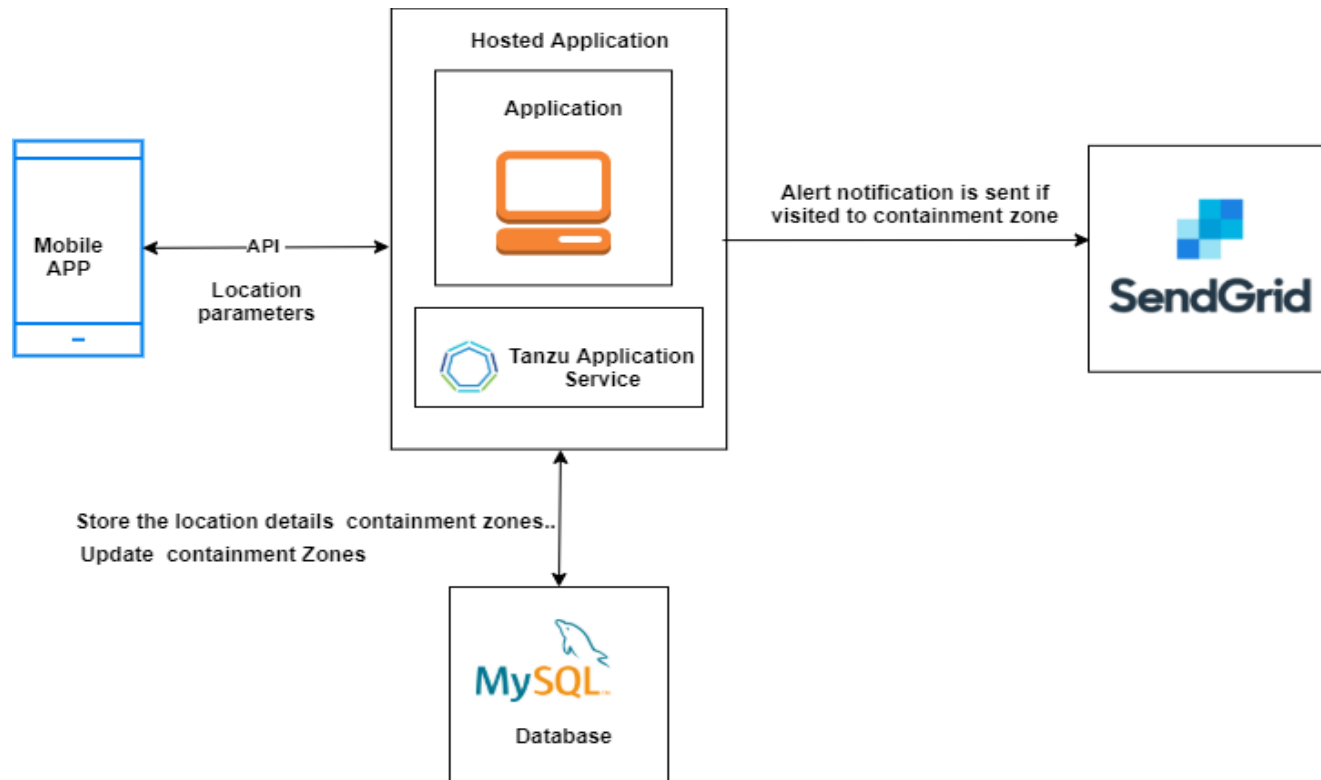

Table- 1 :
Components

& Technologies:

S.No	Component	Description	Technology
1.	User Interface	Interaction of user to the mobile interface (i.e- developers)	HTML, CSS, JavaScript / Angular Js / React Js etc.
2.	Application Logic- 1	Logic that been kickstarted first for the process in the application.	Java / Python
3.	Application Logic- 2	Intermediate Logic for the process in the application	IBM Watson STT service
4.	Application Logic- 3	Logic which came Last which is not least for the process in the application	IBM Watson Assistant
5.	Dat abase	St oring purposes.	MySQL, NoSQL, etc.
6.	Cloud Dat abase	Dat abase Service on IBMCloud	IBMDB2, IBMCloudant etc.
7.	File St or age	St or age requirements	IBMBlock St or age or Ot her St or age Service or Local Filesystem
8.	Ext ernal API - 1	API used external in the application	Google API , etc.
9.	Ext ernal API - 2	API used external in the application	Aadhar API , etc.
10.	Machine Learning Model	Machine learning is mostly used for AI purposes(i.e: Recognition)	Object Recognition Model, etc.
11.	Infrastr uct ure (Server / Cloud)	Application Deployment on Local System/ Cloud Local Server Configuration: Cloud Server Configuration :	Local, Cloud Foundry, Kubernetes, etc.

Table- 2: Application Characteristics:

S.No	Characteristics	Description	Technology
1.	Open- Source Frameworks	Software designed to be publicly accessible in decentralized and collaborative way.	Technology of Opensource framework
2.	Security Implementations	It is used to provide security for the user by providing various technologies (i.e : signature for text or data files)	e.g. SHA- 256, Encryptions, IAM Controls, OWASP etc.
3.	Scalable Architecture	Scalability is provided.(Micro- services)	Cloud ,IBM object storage
4.	Availability	Use of cloud makes it available on the go anywhere and anyplace.	Cloud
5.	Performance	Design consideration is the must because there are numerous app but in what way our app is should be known is mandatory. (speed,number of requests per sec, use of Cache, use of CDN's) etc.	SendGrid
